

CHAPTER IV

THE DETAILED WORK PLAN

A community should be planned with an eye to the effect made upon the citizenry by being continually surrounded with a maximum of beauty. Many times this precept is neglected by a community's citizens as they become at first accustomed to and finally visually calloused to the deficiencies within their environment.

Although Woodfin offers many positive environmental features, there is much which can be done to improve the overall visual environment of the Town.

Such a challenge cannot be met with the creation of a few parks or playgrounds. It will require attention to all facets of the community--from buildings to road structure to vacant lots. A concern for sound appearance must infuse every aspect of the Town, and this concern should be the responsibility of the local government, supported by active and concerned citizens.

The project of beautifying Woodfin cannot be done by isolated individuals. It will require a cooperative community effort channeled through the Woodfin Beautification Commission.

This section presents a list of projects which, if implemented, will result in the eventual realization of the community appearance goals. The following list is not presented in any priority form but are listed at random in their order. Also, the list of projects is not intended to include all visual liabilities, but is rather intended to be a reasonably comprehensive work program with priorities to be established by the Town Officials acting upon recommendations by the Beautification Commission.
